

Highview Christiana Raingarden Retrofit

Project:

A 500 square foot bioretention cell was installed to provide water quality treatment for the first ½ inch of stormwater runoff from approximately 14,000 square feet of impervious parking area.

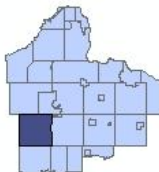

Funding:

Total project cost	\$4,233
State Clean Water Funds	\$1,380
Local Watershed	\$ 400
Landowner	\$2,453

Location:

Eureka Twp
Minnesota

Practice:

Stormwater Retrofit
(Bioretention)

Benefits:

Stormwater runoff volume reduction

Reduction in suspended solids and phosphorus

Stormwater runoff temperature reduction

Improved water quality

Partners:

Minnesota Board of Water and Soil Resources

North Cannon River Watershed Management Organization

Watershed:

Cannon River

Construction 2010

Clean Water Fund:
Protecting and restoring
Minnesota's waters
for generations to come.
